EXPERIENCE

Microsoft **Hyderabad, India**

Software Engineer II – *Azure Backup* Aug 2026 - Present

- Own **end-to-end feature delivery and production reliability** across **Azure Kubernetes Service (AKS) and Azure Disk Backup**, spanning design, implementation, releases, customer support, and service reliability metrics.
- Expanded AKS backup coverage by delivering **Azure Files backup and restore to vault storage** with the storage team; enabled PowerShell and CLI support for **Elastic SAN**.
- Designed **Microsoft Entra ID authentication** for private storage restores, enabling secure recovery across regions while preserving compatibility with existing customers.
- Strengthened service security through a **shared request-validation library** to prevent server-side request forgery and enforcement of network isolation policies.
- Resolved **concurrency-related restore failures** and improved snapshot-cleanup monitoring to detect stale resources and prevent recovery blockers.

Software Engineer – *Azure Backup (AKS & Disk)* Aug 2024 - Aug 2026

- Designed and delivered **Premium SSD v2 and Ultra Disk backup and restore** across AKS and Disk Backup, supporting **80+ subscriptions and 800+ disks** and reducing the recovery point objective (RPO) from **12 hours to 4 hours**.
- Delivered **backup configuration updates** across backend services, Azure Portal, and CLI for **100+ customers**; launched Azure Files operational backup preview, reaching approximately **20% adoption among existing customers**.
- Led upgrades of **Velero, the open-source Kubernetes backup framework integrated into Azure Backup**, improving cleanup performance by **50%** and eliminating **28 known vulnerabilities**; contributed upstream fixes and Azure integration tests.
- Improved platform reliability to **99.9%** and eliminated recurring high-severity incidents through resilience improvements; built **AI-assisted diagnostic tooling** that reduced customer incident investigations from **2–3 days to hours**.

Cloudera **Bengaluru, India**

SDE 2 – *Compute Operations* Dec 2023 - Aug 2024

- Built a **Kubernetes resource-provisioning system** using **Django and Ansible**, automating allocation workflows and enforcing resource quotas across custom cluster configurations.
- Owned an organization-wide **cloud cleanup and cost-analysis platform** using **Go and React**, delivering feature enhancements, production support, and approximately **$5K/month in savings**.

SDE 1 – *Compute Operations* Aug 2022 - Dec 2023

- Built a **cloud cost-optimization platform across AWS and Azure**, reducing costs by **55% within three months** and sustaining approximately **30% average savings**.
- Automated **Kubernetes deployments and migrations** with **Ansible and Helm** across Rancher and OpenShift; deployed **Prometheus, Grafana, and Alertmanager** for cluster monitoring and alerting.

SKILLS

Distributed Systems & Cloud Engineering | RESTful APIs & Microservices | Systems Programming & Performance | Messaging & Storage Systems (Relational & NoSQL) | Platform & Plugin Development | C#, Golang, Python, C/C++ | Kubernetes (Controllers, Operators, CSI) | Containerization & Orchestration (Docker, Helm) | Infrastructure Automation & CI/CD | Reliability Engineering | Observability & Tracing | Resiliency & Testing | Security Management | Applied AI Tooling

AWARDS & RECOGNITION

Microsoft: Azure Core Impact Award (FY26 Q3); Azure Core Compute Culture Award (Jun 2025).
Cloudera: Commitment Code Award (Apr 2023, Jun 2024).

EDUCATION

B.Tech in Computer Science Engineering	*Kalinga Institute Of Industrial Technology*	2022	**9.5 CGPA**
Higher Secondary	*FIITJEE Junior College*	2018	**94.1%**
