Priyansh Choudhary

SOFTWARE ENGINEER II | Reports to: Shashank Rachamalla

Connect Nov 2024

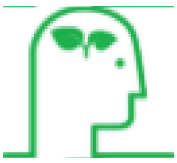

Connects provide a regular touchpoint where you and your manager can come together with a growth mindset to reflect on impact and discuss areas for improvement and future development.

Fixed Mindset leads to a desire to look smart and therefore a tendency to avoid challenges, give up easily, see failures as fruitless or worse, ignore useful negative feedback and feel threatened by the success of others.

Growth Mindset leads to a desire to learn and therefore a tendency to embrace challenges, persist in the face of setback, see failures as essential to mastery, learn from criticism and find lessons and inspiration in the success of others.

Plan for the future

Think about opportunities for impact in the upcoming Connect period. What are your 3-5 core priorities?

Set your core priorities

Core priorities

1. **Expanding Testing Frameworks for Feature Reliability**

   Focus areas for the upcoming period to drive business impact:

- Enhance BVT coverage by adding more scenarios to the E2E setup for features going GA, ensuring early detection of potential production issues.
- Optimize daily BVT runs to proactively identify high-priority issues, reducing the blast radius and improving overall reliability.
- Collaborate with stakeholders to align testing strategies with customer use cases, ensuring relevance and impact.

Success measures:

- Achieve 100% SLA compliance for daily BVT execution and issue reporting.
- Reduce critical production incidents attributable to undetected bugs.
- Deliver >90% coverage for prioritized feature scenarios in BVTs within the next quarter.

2. **Enhancing Operability and Monitoring**

Focus areas for the upcoming period to drive business impact:

- Develop and deploy updated TSGs and operability dashboards to streamline debugging processes for vaulting and tiering.
- Create metrics and tools to minimize generic error occurrences and guide users toward specific, actionable resolutions.
- Support frontliners with enhanced visibility into bugs, enabling quicker resolution and improved customer satisfaction.

Success measures:

- Reduce CRIs related to vaulting by 30% compared to previous reporting periods.
- Ensure 90% of common issues are addressed via self-service TSGs and dashboards.
- Achieve a 20% reduction in average bug resolution time for frontliners.

3. **Expanding Knowledge of Disk Product**

Focus areas for the upcoming period to drive business impact:
Expanding Knowledge of Disk Backup and Restore Frameworks

- Study and gain a thorough understanding of the disk backup and restore framework, with particular emphasis on private network backup support.
- Begin supporting backup scenarios in private networks and contribute to feature enhancements for the product.
- Collaborate with the team to identify new opportunities for improvement once fully onboarded.

Success measures:

- Provide feature support for at least one private network backup scenario within the next quarter.
- Propose and contribute to two new features/enhancements in the disk backup and restore framework.

4. **Contributing to Open Source Initiatives**

Focus areas for the upcoming period to drive business impact:

- Begin meaningful contributions to Velero, with a focus on its integration and usage within the product.
- Identify high-impact areas in Velero to address bugs, add features, or optimize workflows.

Success measures:

- Deliver at least 3 meaningful contributions to Velero within the next six months.
- Ensure that at least two of these contributions directly enhance our product usage and reliability.
- Receive positive feedback from the Velero community on contributions.

Diversity & Inclusion (D&I) Core Priority

To realize our mission to empower every person and organization on the planet to achieve more, each and every one of us must help create a diverse and inclusive culture where everyone can bring their full and authentic self, in alignment with our values. Consider how you will **deliver successful impact by consistently demonstrating Microsoft's cultural expectations and values**. Visit the Diversity & Inclusion (D&I) Core Priority page for guidance and examples of impact.

Select and commit to at least one focus area from the options below, or create one of your own.

Engaging in constructive 1:1 or group discussions around D&I

Practice allyship skills in the moment

Actively participate in Employee Resource Groups

Complete D&I learning, reflect on new knowledge and practice what I learn

Seek diverse perspectives and incorporate feedback, apply insights from a variety of sources and people

How will you define success as you activate your D&I Core Priority?

- Successfully participate in at least three 1:1 or group discussions focused on D&I topics each quarter, fostering open dialogue and shared learning.
- Receive positive feedback from colleagues on creating a safe and inclusive space for expressing diverse perspectives.
- Commit to attending at least one ERG event or initiative monthly, contributing actively to discussions or projects.
- Share key takeaways from D&I learning sessions with my team and incorporate feedback to improve my understanding and application of inclusive practices.

Security Core Priority

We all have the responsibility to directly contribute to the security of Microsoft and our customers. We must all commit to prioritizing the design, build and delivery of technology, tools, data and processes that meet the highest possible standard of security. **For more information on the Security Core Priority, visit** HRweb**.**

With this priority, I personally commit to being an active and intentional participant in creating a secure Microsoft by:

- Completing and applying learnings from required Security Foundations and Trust Code (Standards of Business Conduct) trainings.
- Prioritizing security in my own work and ensuring I have anticipated and implemented secure approaches to products, processes and tools **in alignment with our** Secure Future Initiative.
- Committing to leveraging MSProtect to learn more about how I can contribute to securing Microsoft, including reporting any digital or physical security incidents via Report It Now.

- If any code vulnerabilities or deviations from SFI are identified, I will commit to:
  - Reporting them promptly through MSProtect or the appropriate reporting mechanism.
  - Taking ownership to address and fix such issues, aiming to resolve them within the current release cycle wherever feasible.

Manager comments

Priyansh, following are the common core priorities I want you to track for upcoming 6 months. Please go through them carefully and let me know if I need to make any tweaks, etc.

- **Security**
  - **Security Above All Else** – I will ensure any reported security violations are resolved within SLAs.
  - **Stay Green on Security** – I will make sure that I do not cause any security regressions by creating non-compliant resources or by violating access policies.
  - **Embed Security Early** – I will conduct security reviews at the design phase itself rather than later stages.
  - **Curiosity and Understanding** – I will be curious and develop a deep understanding of security issues/bugs before fixing them.
  - **Proactive Security Vigilance** – I will go above and beyond by reviewing code for security concerns, even in areas I may not be owning directly.
- **Quality & Operability**
  - Taking accountability for improving our TSG coverage, dashboards, and BVTs/runners/unit tests coverage.
    - Metric: Number of TSGs, tests, dashboards, and runners added or improved.
  - Achieve and sustain a 99.9% SLA for Disk/AKS backups/tiering and a 100% SLA for restore/CRR.
    - Metric: MSR SLA.
  - Achieve and sustain a 99.9% platform SLA for DPP BA.
    - Metric: MSR platform SLA for key BA operations.
  - Zero self-inflicted outages in production due to code/config changes
    - Sev 0/1/2 outage count in production.

    - Achieve and sustain CRI mitigation within 10 days.
        - Metric: Average CRI TTM for CRIs you have handled.
    - Ensuring all BVTs (both new and existing) are stable in Canary environments.
        - Metric: Overall BVT green days criteria tracked at the BCDR level.
    - Participating in PR review meetings and taking accountability for reviewing active PRs and ensuring code hygiene
        - Metric: Participation through PRs reviewed and comments added.
    - Scheduling explicit review of test plans for large work items (spanning months), including scale, performance, and negative testing.
- **Planning & Tracking**
    - SME on-call: Tracking internal/external partner issues only through ADO work items and working with partners for clear ETAs.
    - Sending weekly tracker emails clearly outlining overall progress and risks for work items spanning months.
    - Bubbling up any risks in committed monthly plan one week in advance.
- **OSS**
    - One PR per quarter in the Velero GitHub repo (as part of OSS contributions).
        - Metric: PRs raised, with bonus points for more PRs and participation in community discussions.
- **Diversity & Inclusion**
    - Defining atleast one D&I goal for self and moving the needle for that goal.
    - Committing to turning on cameras during 1:1s and team meetings.
    - Contributing to the success of others by sharing knowledge either through documentation or through KT sessions.
        - Metric to track will be number of documents churned/KT sessions given.

Priyansh, following are the feature specific core priorities I want you to track

- **Support for customizing Disk attributes during restore** - Ramp up on the current disk backup solution we offer. Set up, self-host, and try out the scenarios from the portal/CLI to understand the user experience. Collaborate with the PM to grasp the user experience aspects of the changes needed to support customizations during restore for Disk access object, encryption settings, and zone. Develop a rough cost estimate and review it with your mentor. Coordinate with the portal team to set expectations on the tentative rollout date for these changes in the service and finalize the integration timeline. Additionally, review the common core priorities that should apply to any new feature work. Please also watch out for different permutations and combinations arising for existing and new customers. To summarize, I want you to be the E2E owner for this feature.
    - Metric to track will be prod rollout on committed date adhering to common core priorities.

Priyansh, following are the D & I core priorities I want you to track

- Committing to turning on cameras during 1:1s and team meetings.
- Contributing to the success of others by sharing knowledge either through documentation or through KT sessions.
    - Metric to track will be number of documents churned/KT sessions given.
- Being bold in putting across your ideas and not worrying about what others might think.

Conversation starters

Choose any of these optional prompts to continue great conversations with your manager. Write a brief response (1-15 words).

Of my strengths, the ones I'd like to apply more in my work are:

> My strengths are my deep problem-solving ability, quick learning, and determination to find solutions. I'm motivated by the challenge of resolving issues and strive to deliver the best results. I take pride in my work, putting in extra effort as it reflects my personal standards, and I am able to quickly apply new technologies to streamline processes.

In my work, I feel motivated or energized by:

> I feel most motivated when my work is recognized and appreciated, as it validates my efforts and drives me to perform even better. Additionally, I find great satisfaction in knowing that my contributions make a positive impact by simplifying tasks for others, whether it's for a peer or a customer

In my work, I lose motivation or energy from:

> I lose motivation when faced with issues beyond my control, such as limited resources or unforeseen problems that waste time and hinder progress.

I know I can't do everything on my own. I'd like help with:

> I try to plan my work assigned with priorities and pick them up in the same order.
> I also like to take help from my peers and the GPT models to provide insights, suggestions, and support in overcoming challenges or brainstorming solutions more effectively.

It can be challenging to prioritize important topics for 1:1 conversations. Plan ahead and flag any of the following topics you'd like to discuss with your manager in upcoming conversations.

Select any conversation topics below, or add your own:

> **Opportunities**: Increase my responsibilities, such as new core priorities, stretch assignments, promotion or becoming a people manager.
>
> **Alignment**: Clarify priorities and expectations for successful impact.
>
> **Learning**: Explore potential development and growth opportunities to optimize your performance.
>
> **Feedback**: Get input on how I'm doing in my role and how to deliver great impact.

Check out aka.ms/career for resources and guides on developing your career.

Manager comments

Please bring these up in our 1:1s so that we can spend quality time and discuss around them.
